EDUCATION

The University of Texas at Austin   Bachelor of Science, Mechanical Engineering   May 2025
Minor in Computer Science
Concentration: Statistics, Probability, Data Science

EXPERIENCE

The Home Depot – *Software Engineering Intern;* Remote   May 2023 – Aug 2023
- Built a Kubernetes Machine Learning pipeline to populate Big Query column descriptions, streamlining data retrieval for analysts
- Prompt engineered for Google PaLM 2 Large Language Model, to generate descriptions for company data with 75% accuracy
- Validated descriptions using a tested BERTScore model, saving 100+ man-hours
- Identified database queries as a system painpoint and accordingly parallelized backend queries, reducing latency by 70%

Texas Department of Transportation – *Engineering Support Intern;* Austin, TX   May 2022 – Aug 2022
- Deployed script in periodically to update 10,000+ company devices to Windows 21H2
- Automated device backup and notifications with Microsoft System Center Configuration Manager (SCCM)
- Designed and built custom user interface for annual company conference
- Optimized laptop set-up process with automated USB drive, streamlining manual process by 150%

Fire Research Group – *Undergraduate Researcher;* Austin, TX   Mar 2022 – May 2023
- Ignited an electric vehicle in a sealed garage and constructed a solenoid gas pump system to extract the air for a toxicity screen
- Developed a Python script to analyze battery fires with a mathematical model relating gas colors to toxicity (85% accurate)

ACADEMIC PROJECTS

Wine Quality Predictor – *Intern (The Home Depot)*   Summer 2023
- Trained a machine learning model that predicted wine quality with 61% accuracy
- Determined the quality on a scale 1-10 based on 11 factors using a RandomForrest Regressor

Delivery Drone – *Project Lead (UAVA)*   Spring 2023
- Designed a body and electrical system for a drone that would deliver emergency medical supplies to students on campus
- Programmed AI flight control algorithm for a drone to travel the safest and quickest path to and from destination

Household Object Finder – *Competitor (UT Austin)*   Fall 2021
- Competed in a hackathon for the most accurate ML model to identify certain objects from living room pictures
- Received 1st place by utilizing a neural network to successfully identify all 38 unique household objects required by the rules

LEADERSHIP EXPERIENCE AND ACTIVITIES

Unmanned Aerial Vehicles Austin (UAVA) – *Project Lead*   Fall 2022 – Spring 2023
- Supervised hardware and software teams of 15 to develop parts, flight test, and deliver a scheduled drone
- Taught needed technical skills (CAD, Python) to new members and facilitated their integration into the existing teams

Texas Raas – *Executive Board*   Fall 2023 – Present
- Spearheaded the production of a dance, including audio track, choreography, theme, and props for 5 national competitions
- Delegated tasks to efficiently meet deadlines set by captains, while managing a $15,000 budget

SKILLS

Languages and Frameworks: Python, SQL, R, JavaScript, React, Java, MATLAB, HTML, CSS, Powershell, C++
Developer Tools: Git, VS Code, PyCharm, Google Cloud Platform, Jira, Kaggle, SCCM
Libraries: NumPy, Pandas, Matplotlib, Sci-Kit Learn, TensorFlow, PyTorch, NLTK
Relevant Coursework: Software Design, Data Structures/Algorithms, Linear Algebra, Statistics, Probability, Engineering Computation
Mechanical: CAD, Laser Cutting, 3D printing, Machining, Embedded Systems, Dynamic Systems, FEA, System Design, Arduino

ADDITIONAL INFORMATION

Interests: Music Production, Project Cars, Entrepreneurship, Drawing, Traveling, Cooking, Chess, Poker
Achievements: Raas All-Stars National Championship 1st Place (2023), President's Volunteer Service Award (2020)
Work Eligibility: Eligible to work in the U.S. with no restrictions
